

WHO WE ARE?

At Meltmann sp. z o.o. we make producing highest quality products, which will meet the expectations of even the most demanding customers our top priority.

For many years we are the only manufacturer in Poland, who produces spare parts and other components for Hot Melt adhesive systems, compatible with leading market solution from companies, such as: Nordson®, Robatech®, ITW Dynatec®, Melton®, Meler® Inatec® and others.

Moreover we have the biggest stock of spare parts not only in Poland but in whole Eastern Europe, so you do not have to wait for your order. to be produced. It's already waiting for you at our shelves, and can be shipped to straight away.

Our company was established in 1994. At the beginning known as MC sp. z o.o. now rebranded to Meltmann sp. z o.o. Our quality can be proven by the growing number of companies cooperating with us, using products not only produced by our engineers and technologists, but specially designed, tailored for their own needs. That shows how big trust they have in us.

FROM DESIGN TO REALISATION

Beyond our ready to use products, which are an effect of years of development and tests, we can offer wide range of additional solutions and services unique in Europe.

Our customer oriented team of engineers and technologists is not only constantly working on improving our products but also developing brand new solutions, which are based on the customer's individual needs and customized for specific work conditions.

Combination of our team's experience and our modern machinery park, equipped in both convectional and modern CNC milling machines, gives us a great advantage over our competitors and puts us at first place in Hot Melt industry, in Eastern Europe.

MORE THAN JUST PARTS

Also complementing our standardized and tailor made components, we can offer to our customers professional technical consulting and services such as comprehensive reviews of Hot Melt adhesive systems.

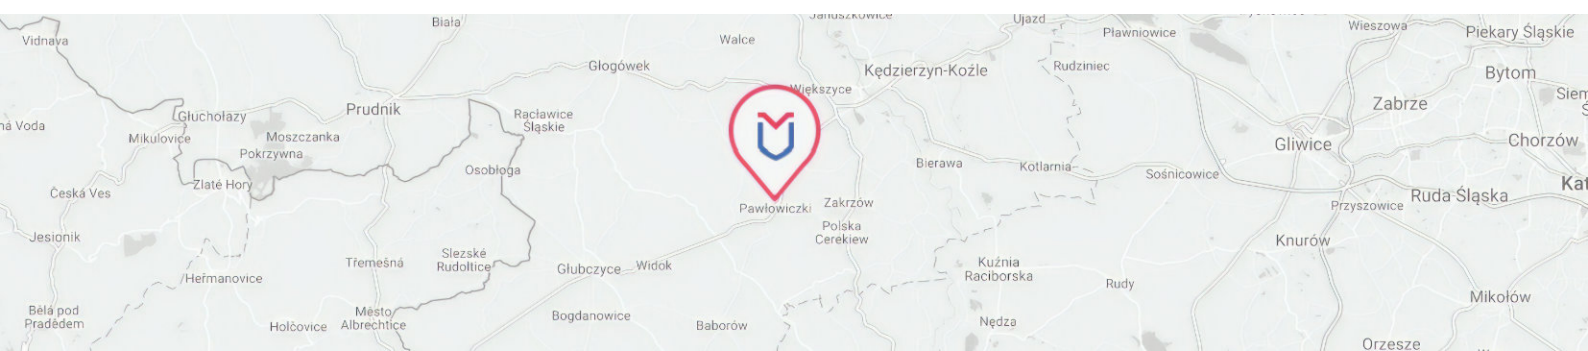

Such service, depending on the individual arrangements with our clients, may contain:

- Replacing or regeneration of applicator heads, modules and tanks,
- Replacing of filters, heating hoses, nozzles and other elements,
- Repairing of broken, burned or damaged elements,
- Evaluation of current status of system joints connectors,
- Other, individual arrangements services.
